Docket # 2022-58-T

Request for Extension to Comply

To whom this matter concerns,

My Business 1 TRUE Measure, LLC was granted approval to do business on February 9, 2022.

I was given a fair amount of time to comply to all requirements, yet need an extension do to vehicle registration issues. I purchased a vehicle which tags were supposed to be transferred and registered to Virginia. The car company used my delivery address to put on the contract, which did not match my documentation or license. I contacted them to let them know that the registration was for Virginia and it needed to be fixed. They started a rebuild. I was told by SC that I would need the vehicle registered to South Carolina in order to get my proper charter hard tags. I contacted the car company (Carvana) to make changes after I got my SC driver license plus signed leased. Once Carvana was contacted, I was advised the process could take up to 60 to 80 additional days. I received a confirmation that the rebuild was officially started. If I proceed with the commercial insurance I will be paying over \$700 a month before my business doors open. I understand that your office will give me 30 day tags, but in the event the rebuild of my loan process exceeds the 30 days, I will not be able to get the hard tags for my charter company nor work. This will cause my business and me to fail before getting started.

I have paid all fees and completed requirements to comply, except the commercial insurance due to the registration rebuild

I have the quotes and know which company I will purchase the commercial insurance through. I am in need of an extension from your offices to fully comply with the requirements to open my business doors.

Thank you for your consideration.

Sincerely,

Lakisa Williams
